

# Flight Workshop 1–Controlling Your Aircraft

## Postflight Briefing

VFR local flight 1.0 to 1.5 hours

You will be able to lead the postflight briefing discussion with your flight instructor, including the following tasks:

Task	Desired Outcome Level	
	Practice	Manage/ Decide
Discuss the maneuvers and takeoffs and landings as they relate to real-world situations.	<input type="checkbox"/>	<input type="checkbox"/>
Discuss the effectiveness of decisions made during the flight and any alternative solutions.	<input type="checkbox"/>	<input type="checkbox"/>
Update the Progress Management Record (PMR) with the current lesson achievements to track overall course progress.	<input type="checkbox"/>	<input type="checkbox"/>
Discuss remedial activities if minimum desired outcome levels not met.	<input type="checkbox"/>	<input type="checkbox"/>
Identify the lesson objectives that need to be carried forward to subsequent flight lessons.	<input type="checkbox"/>	<input type="checkbox"/>

## Flight Workshop 2–Exploring Equipment Operating Levels

### Postflight Briefing

*VFR (IFR Option) three-leg cross-country flight 2.0 to 2.5 hours*

You will be able to lead the postflight briefing discussion with your flight instructor, including the following tasks:

Task	Desired Outcome Level	
	Practice	Manage/ Decide
Discuss the equipment operating levels and when it is appropriate to use and shed equipment during a flight.	<input type="checkbox"/>	<input type="checkbox"/>
Discuss the effectiveness of decisions made during the flight and any alternative solutions.	<input type="checkbox"/>	<input type="checkbox"/>
Update the Progress Management Record (PMR) with the current lesson achievements to track overall course progress.	<input type="checkbox"/>	<input type="checkbox"/>
Discuss remedial activities if minimum desired outcome levels not met.	<input type="checkbox"/>	<input type="checkbox"/>
Identify the lesson objectives that need to be carried forward to subsequent flight lessons.	<input type="checkbox"/>	<input type="checkbox"/>

# Flight Workshop 3—Managing Abnormal and Emergency Situations with Automation

## Postflight Briefing

VFR (IFR Option) three-leg cross-country flight 2.0 to 2.5 hours

You will be able to lead the postflight briefing discussion with your flight instructor, including the following tasks:

Task	Desired Outcome Level	
	Practice	Manage/Decide
Discuss the following aircraft systems as they relate to the abnormal and emergency procedures performed during the lesson: <ul style="list-style-type: none"> <li>• Electrical system backup features</li> <li>• Difference between steady and flashing ALT annunciators</li> <li>• Ice protection system characteristics</li> <li>• Relationship between the PFD, GPS, and the autopilot</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>
Discuss the effectiveness of decisions made during the flight and any alternative solutions.	<input type="checkbox"/>	<input type="checkbox"/>
Update the Progress Management Record (PMR) with the current lesson achievements to track overall course progress.	<input type="checkbox"/>	<input type="checkbox"/>
Discuss remedial activities if minimum desired outcome levels not met.	<input type="checkbox"/>	<input type="checkbox"/>
Identify the lesson objectives that need to be carried forward to subsequent flight lessons.	<input type="checkbox"/>	<input type="checkbox"/>

# Flight Workshop 4—Managing Abnormal and Emergency Situations Manually

## Postflight Briefing

VFR (IFR Option) three-leg cross-country flight 2.0 to 2.5 hours

You will be able to lead the postflight briefing discussion with your flight instructor, including the following tasks:

Task	Desired Outcome Level	
	Practice	Manage/Decide
Discuss the following aircraft systems as they relate to the abnormal and emergency procedures performed during the lesson: <ul style="list-style-type: none"> <li>• Electrical system backup features</li> <li>• Difference between steady and flashing ALT annunciators</li> <li>• Ice protection system characteristics</li> <li>• Relationship between the PFD, GPS, and the autopilot</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>
Discuss the effectiveness of decisions made during the flight and any alternative solutions.	<input type="checkbox"/>	<input type="checkbox"/>
Update the Progress Management Record (PMR) with the current lesson achievements to track overall course progress.	<input type="checkbox"/>	<input type="checkbox"/>
Discuss remedial activities if minimum desired outcome levels not met.	<input type="checkbox"/>	<input type="checkbox"/>
Identify the lesson objectives that need to be carried forward to subsequent flight lessons.	<input type="checkbox"/>	<input type="checkbox"/>

# Flight Workshop 5—Reviewing Abnormal and Emergency Procedures

## Postflight Briefing

VFR (IFR Option) three-leg cross-country flight 2.0 to 2.5 hours

You will be able to lead the postflight briefing discussion with your flight instructor, including the following tasks:

Task	Desired Outcome Level	
	Practice	Manage/Decide
Discuss the following aircraft systems as they relate to the abnormal and emergency procedures performed during the lesson: <ul style="list-style-type: none"> <li>• Electrical system backup features</li> <li>• Difference between steady and flashing ALT annunciators</li> <li>• Ice protection system characteristics</li> <li>• Relationship between the PFD, GPS, and the autopilot</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>
Discuss the effectiveness of decisions made during the flight and any alternative solutions.	<input type="checkbox"/>	<input type="checkbox"/>
Update the Progress Management Record (PMR) with the current lesson achievements to track overall course progress.	<input type="checkbox"/>	<input type="checkbox"/>
Discuss remedial activities if minimum desired outcome levels not met.	<input type="checkbox"/>	<input type="checkbox"/>
Identify the lesson objectives that need to be carried forward to subsequent flight lessons.	<input type="checkbox"/>	<input type="checkbox"/>

# Flight Workshop 6–Final Evaluation

## Postflight Briefing

*VFR (IFR Option) three-leg cross-country flight 2.0 to 2.5 hours*

You will be able to lead the postflight briefing discussion with your flight instructor, including the following tasks:

Task	Desired Outcome Level	
	Practice	Manage/Decide
Discuss the effectiveness of decisions made during the flight and any alternative solutions.	<input type="checkbox"/>	<input type="checkbox"/>
Update the Progress Management Record (PMR) with the current lesson achievements to track overall course progress.	<input type="checkbox"/>	<input type="checkbox"/>
Discuss remedial activities if minimum desired outcome levels not met.	<input type="checkbox"/>	<input type="checkbox"/>
